Worm farm help

Posted by Julie Knol - 16 May 2011 08:13

Hi Dan,

I try to use all my vegetable peelings and egg shells in my worm farm and if I have excess I put in my compost heap. I have not long started my worm farm and still wondering if I am getting it right, but I am trying. Maybe you could help with a query, when I put the worms and dirt or castings (what came in the box) into my worm farm. Is that the worm casting that come with the worms, do I have to take some of it out to use in my garden. If I do, how do you separate it from the worms and do you know how long it take to get worm wee. I only started with 500 worms but have got more as the food was getting mushy and mouldy before it was eaten. Thank you for taking the time to set up this forum, I hope more people come on board.

Julie
