Jackpot in EGT

The products of Euro Games Technology are not as widespread as online gambling games of more well-known brands. However, the models of this manufacturer deserve the attention of users, because they have a variety of interesting features and obvious advantages.

One of them seems to us to be the presence of four cumulative jackpots, which are played at any bet made with real money.

How to hit the jackpot in EGT https://top10-casino.net/jackpot-in-egt/

Jackpots are growing due to the deductions of a small part of the bets that users make when playing for money. Jackpots are called according to the suits of cards, which is important when they are drawn.

The current amounts are indicated in the windows above the reels.

To become the owner of the jackpot, you need to get into a special round. It can be launched in any of the spins.

The size of the bet at which you are playing does not matter.

When the round starts, you will see twelve closed cards.

You need to select them in any order.

You will do this until you collect three cards of the same suit.

It is this jackpot that you will get.

Then it will start growing again.

The round is a win-win. Once in it, you will definitely receive one of the four amounts.
